

Meeting Highlights and Action Plan

Agenda Item/ Topic	Key Points	Action Items
YRBS 2017	Reviewed the results of the 2017 Youth Risk Behavior Survey, which can be found on the Health District website.	
Clark County teen births & sexual activity report	Reviewed the results of the ODH report on birthrates in Clark County.	
Maternal Child Health grant FY19	Melissa D. and Leslie S. gave an overview of the FY19 Maternal Child Health grant: Strategy 1 – work with small business (less than 50 employees) to create programs and policies regarding women’s preconception health; Strategy 2 – work with local community recreation center to assess access of center for youth and youth programs.	
Brochure: final review	One error corrected and PPSWO will check to see if they now have free pregnancy testing available; initial print will be 2500; web-friendly version will be made available; distribution will begin at the next task force meeting with each person deciding how many to take and where they will deliver. This will serve as a way to track where and how many are distributed.	Diane will make correction and place order at printer.
Summary of current education	Due to confidentiality, PPSWO does not wish to publically share which schools they are working in, but is willing to share with the task force. Group feels a summary of curricula and grade levels taught for each school will be helpful. Form will be revised to align with the outcome of discussion.	Lori will send revised form to FYI and PPSWO.
Appreciation	Thank you to Ellen D. for her service to the task force the past several years! Welcome to Ashley from Springfield High and Britney from the Health District.	
Next HBHSTF meeting	Monday, February 25, 2019 @ 1:30 pm Monday, April 29, 2019 @ 1:30 pm
