

Visioning

On March 28, 2019, the CHA Steering Committee gathered to develop a vision statement and shared values.

Vision Statement

A healthy Clark County is a thriving community that recognizes, values, and pursues health and overall wellness.

What This Means

This means that we value relationships, partnerships, and collaborations that unify and advance our priorities. We believe our unified priorities will infuse a quality output that results in fresh, creative solutions to our community health challenges.

With these new priorities and creative solutions in mind, it is our hope to better communicate with each other, instilling the value of good health and how to achieve it as a thriving, connected community.

Values in Action

Collaboration

We value partnership and inclusion, and as a result, anticipate mutually reinforcing activities that align with our unified goals and vision.

Engagement

We will empower and engage the best of our organizations to build relationships and trust that drives forward new opportunities and results.

Prioritization

Prioritization is a sensitivity to the most pressing needs and a recognition that our collaborative efforts create greater impact and momentum when unified.

Quality

Quality is our expectation as an end result, for the wellness of our community.

Communication

Communication is key to empower, engage, and partner in our community, to build trust with community members.

Creativity

Creativity is necessary to find new and different solutions to existing community challenges, envisioning new ideas for the betterment of our community.
