

Meeting Highlights and Action Plan

| Agenda Item/ Topic | Key Points | Action Items | Responsible Party/ Timeline |
|---|---|---|--------------------------------|
| Started working on the work plans | Discussed the first goal in the process of implementing into the work plan. In reviewing it may appear that we may not make much change within the school itself, that we may need work on addressing these topics with the parents in a different venue, than trying to change ODEs perspective, the discussion was around ensuring that each school district and superintendent has access to the offerings of each entity as well as what is offered at each school and the timeline, the type of programming etc. | To develop the menu of Sex Ed services that are currently being offered so that a decision could be made in reference to what they may choose for their district, along with compiling the statistics and data necessary. | All Task Force Members |
| Discussed ways in which to reach the parents | Devised talking points about other ways in which to educate the parent on what is being offered within their school. Discussed options such as providing workshops, lunches, targeting church groups. Looking at ideas at starting the information earlier and determining if this can be done. | Developing ideas to address this issue sooner than middle and high school and also developing ideas to creatively educate parents about what is being offered. | |
| <p>Next Meeting Date: Our next meeting date will be Monday June 27th at 1:30pm.</p> | | | |
